

MAHOUT

Website Master Content & Design Brief

V2 — Deep Detailed / No-Guess Build Guide

Purpose

This document is the expanded, no-guess brief for surgically improving the already-started Mahout website. It explains the story, five elements, connected product loop, North Star formation, North Star Brain, habits/behaviors, trends/patterns, letters/reviews, modes, Pro, screenshots, asset briefs, copy, SEO, trust/legal guardrails, and surgical implementation rules.

One-sentence brand spine

Mahout turns your future vision into daily direction — then uses goals, actions, moods, reflections, habits, behaviors, trends, patterns, memory, letters, and reviews to help your North Star guide you with more context over time.

Prepared for Mahout web refinement • Based on app ZIP/product review + website strategy notes • 2026-05-30

Table of contents

- 0. How to use this brief
- 1. Verified Mahout product facts from the app ZIP
- 2. The core story: five elements, one North Star
- 3. North Star origin story: how the ideal future self is formed
- 4. The connected system loop
- 5. The five elements — full web explanation and image direction
- 6. The North Star Brain — separate premium section
- 7. Habits, behaviors, trends, and patterns
- 8. Letters, weekly reviews, and guidance rituals
- 9. North Star conversation modes
- 10. Notifications as a life operating surface
- 11. Free vs Pro, pricing, and North Star Credits
- 12. Website information architecture and section-by-section content
- 13. Visual system and billion-dollar design direction
- 14. Complete asset and screenshot checklist
- 15. Image-generation briefs for every element/sub-element
- 16. Copy bank: hero, sections, cards, FAQ, SEO, CTAs
- 17. Surgical website build rules for Codex/developer handoff
- 18. QA checklist and launch readiness

0. How to use this brief

This brief is intentionally long. It is not meant to be pasted directly into the website. It is the source of truth for surgical design/content edits so nobody has to guess later.

- **Use the newest repo state first.** If the live website already has part of a section, improve it surgically rather than replacing the whole site.
- **Preserve the story.** Mahout is not a generic productivity app. It is a five-element life system centered on a North Star formed from the user’s future vision.
- **Treat copy as product logic.** Do not invent features, prices, privacy/security claims, unlimited usage, or unsupported subscription tiers.
- **Build story-first.** The website must explain why Mahout exists before listing features.
- **Use assets as proof.** Symbolic element illustrations explain the world; screenshots prove the product is real.
- **Avoid repetition.** Do not say the same sentence in every section. Each section should add one new layer of understanding.

Surgical web editing rule
The website is already partly built. Codex/developer passes should inspect current structure first, identify what exists, patch the smallest missing piece, and report exact files changed. No broad rebuild unless explicitly requested.

1. Verified Mahout product facts from the app ZIP

The earlier app ZIP was checked for the current Mahout vocabulary and product surfaces. These facts should guide the website so it matches the app rather than becoming generic marketing.

Area	Source/evidence type	Website implication
Five elements	Confirmed tab/story surfaces	Mountain/Aim, Path, North Star, Mahout, Elephant appear in app strings and navigation concepts.
North Star formation	Onboarding story	North Star is the AI version of the ideal self; the Mountain is the 10–20 year destination; Mahout is conscious self; Elephant is subconscious/heart/instinct; Path is daily actions.
Brain	Repo sections	Brain includes Voice & Boundaries, Identity & Vision/Core, Mentors & Influences, Hobbies, Finances, Long Description, Questions, Memories, Learned, Patterns, Signals, Trends.
Brain ownership model	Repo comments	Owned profile sections are accessible/user-owned; derived intelligence sections include Learned, Patterns, Signals, Trends.
Habits	Domain model	HabitProgress tracks 7/14/30 consistency windows, cumulative success days, progress21, progress66, streak, intended/best block, stability and effort-quality ratios.
Behaviors	UI model	Behavior cards include Best Window, Low Follow-Through Window, Consistency Style, At-Risk Warning, Weekday Pattern, Reminder Sensitivity, General Pattern.
Trends	Domain model	Trend kinds include Mood, Path Behavior,

		and Notification Response.
Patterns	UI strings	Patterns are confirmed/saved insights with evidence, categories like Rhythm, Style, Friction, Recovery, Stacking, Goals, State Links, Preferences, Pillars.
Letters	Prompt code	Scheduled Morning and Evening letters read Receipts Snapshot + full Context Pack and should mention strongest 2–4 signals, not every tab.
Weekly Review	Use cases/tests	Weekly Review evidence brief, handoff prompt, action chips, and formatter exist in code/tests.
Mentors	Brain/editing	Mentors and people admired shape standards, taste, direction, and Mentor mode; cap text indicates up to 10 mentors in app copy.
Monetization	Membership surface	One Pro membership with Monthly and Yearly Founder cadences; North Star Credits terminology; Free foundation remains open; Pro deepens intelligence.

Important app language already present and safe to reuse:

- “Mountain is where direction lives.”
- “The Path is your daily actions.”
- “Mahout is your journal: say it plainly; patterns emerge in the quiet.”
- “Elephant holds the feeling layer.”
- “North Star is your AI guide — your ideal self in motion.”
- “Habits execute. Behaviors endure.”
- “21 successes builds a habit. 66 builds a behavior.”
- “Credits are not used for Path actions, Mountain goals, Elephant mood logs, Mahout journaling, reading saved memories, or existing letters.”

2. The core story: five elements, one North Star

This is the website’s biggest selling point. Lead with the human story, not a feature grid.

Five elements. One North Star.

Mahout is an AI life operating system that connects your future vision, goals, actions, emotions, reflections, and guidance into one calm system.

It begins by helping you name the life you are trying to build.
From that vision, your North Star is formed — the ideal future version of you that can guide your present self back toward what matters.

Mountain holds your goals and direction.
Path tracks the actions you are taking right now.
Elephant helps you understand your emotional weather.
Mahout gives you space to reflect.
North Star connects it all and guides you forward.

This is not another task app.
It is a living system for becoming who you said you wanted to be.

Website promise hierarchy:

1. Mahout is not just a task app, habit tracker, journal, mood tracker, or chatbot.
2. Mahout connects those pieces into one calm life system.
3. The user begins with a future vision.
4. That future vision forms North Star: the ideal future self / guide.
5. Mountain turns vision into Future Goals and Today Goals.
6. Path turns goals into current actions, timers, checkoffs, and receipts.
7. Elephant adds emotional context.
8. Mahout adds reflection and meaning.
9. The Brain remembers and learns.
10. North Star uses the loop to guide with more context over time.

3. North Star origin story: how the ideal future self is formed

This is the highest-value marketing story. It should appear before feature details.

Your North Star begins with your future life.

Mahout asks you to imagine the version of life where the important things worked out — the work, health, relationships, freedom, identity, peace, and impact you are trying to build.

From that vision, Mahout helps shape your North Star: the ideal future version of yourself that can speak back to you, remind you what matters, and guide your present-day decisions.

It is not here to pressure you.

It is here to keep you close to the life you said you wanted.

Website explainer rules:

- **Say:** North Star is your ideal future self, formed from your future life vision.
- **Say:** North Star becomes more useful because it can connect to goals, actions, moods, reflection, memory, and patterns.
- **Do not say:** North Star magically knows everything.
- **Do not say:** North Star guarantees success or fixes life.
- **Do not say:** North Star is therapy or mental health treatment.

Onboarding/future-vision screenshot needed:

- Capture the screen where the app asks about the life the user wants, future self, ideal self, chief aim, or North Star formation.
- Use this screenshot in the website section titled “Start with the life you are building.”
- Do not use messy personal data; create a clean demo vision like “Build a calm, focused, financially stable life with meaningful work, health, and presence.”

4. The connected system loop

The website must explain that the five elements are not separate tabs. They are a loop.

Vision becomes North Star.
North Star gives direction.
Mountain turns direction into Future Goals and Today Goals.
Path turns goals into actions right now.
Repeated Path actions become habits after 21 consistent days.
Longer consistency can reveal behaviors after 66 days.
Elephant adds emotional context.
Mahout adds reflection and meaning.
Brain stores memory, trends, and patterns.
North Star uses all of it to write letters, reviews, and guidance.

Loop stage	Element	What it means	Website language
Future vision	North Star	Life the user wants if the meaningful things work out.	Your ideal future self begins as a vision of the life you are building.
Direction	Mountain	Long-term aims and daily lanes.	Mountain holds Future Goals and Today Goals so the day stays connected to direction.
Action now	Path	Current actions, timers, checkoffs, effort receipts.	Path is what you are doing right now.
Repetition	Habits/Behaviors	Actions repeated over 21/66-day windows.	Habits show what you repeat; behaviors show what repetition is becoming.
Emotion	Elephant	Mood, feeling state, emotional rhythm.	Your emotions are not noise; they are part of the map.
Meaning	Mahout	Journal/reflection/interpretation.	Reflection turns data into meaning.
Memory/intelligence	Brain	Profile, memories, learned patterns, signals, trends.	Brain keeps North Star from being generic.
Guidance	North Star	Letters, reviews, chat, modes, next move.	North Star guides present self toward future self.

5. The five elements — full web explanation and image direction

North Star — Guidance / ideal future self

North Star is your ideal future self — the version of you shaped by the life you deeply want to build. It guides you with context: goals, actions, moods, reflections, patterns, memories, and receipts.

What to show on the website:

- Live guidance
- Morning and Evening Letters
- Weekly Reviews
- Brain/memory continuity
- Modes such as Auto, Analytic, Reflective, Motivator, Mentor
- North Star Credits for live/deeper on-demand intelligence

Asset need	Recommended visual
North Star transparent element image	A glowing star/compass point with a faint future-self silhouette and thin lines connected to goals, actions, moods, reflection, memory.
North Star app screenshot	Capture the strongest in-app screen for North Star. Use clean

	demo data and crop to the story.
--	----------------------------------

Memorable line

North Star is not just AI. It is guidance with memory, direction, and receipts.

Mountain — Goals and direction

Mountain holds direction: Future Goals, Today Goals, deadlines, reviews, and the few lanes that deserve attention today. It keeps the day from becoming a scattered list.

What to show on the website:

- Future Goals
- Today Goals
- A–E priority lanes / overflow where applicable
- Deadlines
- Goal reviews
- Linking goals to Path actions

Asset need	Recommended visual
Mountain transparent element image	A serene abstract mountain with glowing lane markers, a small path up the slope, and a North Star above the peak.
Mountain app screenshot	Capture the strongest in-app screen for Mountain. Use clean demo data and crop to the story.

Memorable line

Mountain shows where you are going.

Path — Actions right now

Path is where goals become action right now. It holds concrete steps, timers, checkoffs, and effort receipts, often linked back to Mountain goals.

What to show on the website:

- Actions
- Timers
- Checkoffs
- Reminders
- Path sessions/time
- Linked goal actions
- Receipts of effort

Asset need	Recommended visual
Path transparent element image	A clean glowing path made of stepping stones, timer rings, and checkmarks leading from a mountain toward the viewer.
Path app screenshot	Capture the strongest in-app screen for Path. Use clean demo data and crop to the story.

Memorable line

Path carries the next honest step.

Elephant — Emotional weather

Elephant helps the user notice what they are carrying. Mood logs and emotional check-ins help North Star understand the weather behind actions.

What to show on the website:

- Mood logs
- Emotional check-ins
- Mood trends
- Feeling-state context for guidance
- Personal rhythm

Asset need	Recommended visual
Elephant transparent element image	An elegant minimal elephant silhouette surrounded by weather symbols: moon, cloud, rain, sun, soft rhythm waves.
Elephant app screenshot	Capture the strongest in-app screen for Elephant. Use clean demo data and crop to the story.

Memorable line

Your emotions are not noise. They are part of the map.

Mahout — Reflection and meaning

Mahout is the reflective space where the user slows down and tells the truth. Journaling and reflection turn the day into meaning, not just completion.

What to show on the website:

- Journal entries
- Reflections
- Saved insights
- Meaning
- Identity
- Self-understanding
- Companion guidance if visible

Asset need	Recommended visual
Mahout transparent element image	An open journal with glowing handwritten lines, inner compass, soft memory fragments, and lavender shadows.
Mahout app screenshot	Capture the strongest in-app screen for Mahout. Use clean demo data and crop to the story.

Memorable line

Some days do not need more pressure. They need to be understood.

6. The North Star Brain — separate premium section

The Brain is a central differentiator. The website should not bury it under generic AI wording. It needs its own section with screenshots and symbolic visuals.

North Star has a Brain.

It remembers your future vision, goals, actions, moods, reflections, mentors, habits, behaviors, trends, patterns, and receipts — then uses that context to guide you with more continuity over time.

Brain section	Meaning for website	Visual/image direction
Voice & Boundaries	How North Star should speak: tone, coaching style, what not to do.	Sound waves from a star or journal page; voice ring.
Identity & Vision / Core	Who the user is becoming: pillars, values, direction, future-self identity.	Glowing identity core/crystal with rings and compass lines.
Mentors & Influences	People/influences that shape standards, taste, direction, and Mentor mode.	Abstract guiding lights/council orbit around North Star; no real faces.
Hobbies	Interests that make the user feel like themselves.	Small constellation of warm hobby symbols.
Finances	Direction, targets, constraints around money and life-building.	Calm ledger/target icon, not aggressive wealth imagery.
Long Description	A richer picture of the future self.	Long-form scroll/card feeding into Brain.
Deepen Future Self / Questions	Five prompts North Star returns to as it knows the user better.	Five soft prompt cards around a star.
Memories	Saved context and continuity by day/month/year where available.	Floating memory cards connected by soft lines.
Learned patterns	Candidate lane — review proposals before they become saved truth.	Learning sprout inside constellation.
Your patterns	Confirmed lane — saved patterns with evidence underneath.	Connected dot map with evidence chips.
Signals	Principles/readouts from logs; straight reads with evidence.	Signal beams/rail, grounded in receipts.
Trends	Short weekly reads from mood and Path; grounded in logged data.	Soft line charts and week arcs.
Today's Evolution	Daily checkpoints; morning/afternoon/evening evolution of Brain.	Three checkpoint lights across a day arc.

Brain section website layout recommendation:

- Use one major hero visual: a luminous abstract brain/constellation behind a phone screenshot of the Brain overview.
- Below it, use a 3×4 or 4×3 grid of small cards: Core, Voice, Mentors, Memories, Learned, Patterns, Signals, Trends, Today's Evolution.
- Use short copy. Do not create a wall of technical terms.
- Include a screenshot of the actual Brain overview and one detail screenshot (memory/learned/pattern).

Brain image-generation brief:

A luminous abstract brain made of constellation lines and soft memory cards. Nodes are symbolized as Voice, Core, Memories, Patterns, Trends, Mentors, and Today's Evolution. The Brain feels alive, calm, and intelligent — not medical, not robotic. Premium

lavender, midnight purple, and warm gold accents, transparent background.

7. Habits, behaviors, trends, and patterns

This is one of Mahout’s coolest web stories: Path actions can become habits and behaviors, then North Star monitors the signal over time.

Path does more than track actions.

After 21 consistent successes, repeated action can begin to look like a Habit.
After 66 consistent successes, deeper Behavior patterns can start to emerge.

Habits show what you repeat.
Behaviors show what your repetition is becoming.
North Star helps you understand both.

Concept	App truth	Website explanation	Best visual
Habit	Path-backed reps; 21-day progress exists in HabitProgress.	A repeatable action/checkoff the user is keeping consistent.	21-day ring of checkmarks; a path line becoming a sprout.
Behavior	66-day progress; behavior types include best window, low follow-through, consistency style, at-risk warning, weekday pattern, reminder sensitivity, general pattern.	A deeper pattern behind consistency — when, where, and how the user follows through.	66-day arc turning action marks into rhythm waves.
Trend	Trend kinds include Mood, Path Behavior, Notification Response.	Movement across days/weeks: effort, mood, follow-through, timing, momentum.	Soft trend dashboard with human line graphs.
Pattern	Confirmed insights with evidence, categories like Rhythm, Style, Friction, Recovery, Stacking, Goals, State Links, Preferences, Pillars.	What keeps returning and deserves attention.	Pattern map of connected dots and recurring loops.

Behavior types that can be explained visually:

- Best window
- Low follow-through window
- Consistency style
- At-risk warning
- Weekday pattern
- Reminder sensitivity
- General pattern

Website section structure:

11. Show Path action screenshot first.
12. Show 21-day Habit visual and copy.
13. Show 66-day Behavior visual and copy.

- 14. Show North Star Brain receiving the habit/behavior signal.
- 15. Show Trends/Patterns as the deeper intelligence layer.

8. Letters, weekly reviews, and guidance rituals

Letters and reviews are emotional proof that Mahout is more than a dashboard. They should feel like the user’s future self writing from real receipts.

Ritual	Purpose	What to say	Visual
Morning Letter	Begin with direction.	Written from recent goals, actions, moods, reflections, habits/behaviors/trends when present. Should name only the strongest 2–4 signals, not recap every tab.	Sunrise letter page with North Star seal and warm lavender light.
Evening Letter	Close the loop honestly.	Uses receipts to help the user understand what happened, what mattered, what was carried, and what should not be forgotten.	Moonlight letter page with quiet closing-loop symbol.
Weekly Review	Connect the receipts.	Looks across goals, actions, moods, patterns, habits, and reflections to show the story the week was building.	Seven day cards connected into a weekly arc with a North Star insight.

Your North Star does not write from a blank page.

It writes from your receipts: what you chose, what you did, what you avoided, what you felt, and what kept repeating.

Screenshot standards for letters:

- Do not use letters with repeated generic openings like “I see you...” every time.
- Do not use letters that make incorrect claims about start windows or Today Goals.
- Use demo letters that show Future Self warmth + receipts + one next move.
- Capture the open letter view and a notification/card view if both exist.

9. North Star conversation modes

Modes explain why North Star can meet different moments. The website should present modes as different lenses, not different bots.

Mode	Website explanation	Icon/visual	Guardrail
Auto	North Star chooses the right stance for the message.	Adaptive compass/star with changing glow.	Use when the user does not want to pick a mode.
Work Focus	Turns direction into next step, plan, priority, or execution.	Target/arrow/action beam.	Use for practical movement and planning.
Analytic	Helps reason, compare, solve, and see tradeoffs.	Prism/logic nodes.	Use for complex choices and pattern analysis.
Reflective	Helps slow down and understand the inside of the moment.	Moon/mirror/calm water.	Use when emotional meaning matters.
Motivator	Grounded encouragement	Warm spark/flame rising from	Use for momentum without

	without hype.	a path.	dishonesty.
Mentor	Guidance through chosen mentors' standards, questions, and perspectives.	Council circle/guiding lantern/mentor constellation.	Do not impersonate real people; say lens, influences, standards.

Mode section image brief:

A central glowing North Star surrounded by elegant mode orbits: Auto, Work Focus, Analytic, Reflective, Motivator, and Mentor. Each mode has a distinct symbol. Premium calm AI guidance style, transparent background.

10. Notifications as a life operating surface

The website should show notifications as tiny operating surfaces, not generic pings.

Notification type	Website example	Value story	Screenshot/asset needed
Today lanes	2 lanes still open ✓ Write daily goals ○ Read 10 pages ○ Send estimate	Mahout brings actual Today Goals back into view.	Android notification screenshot with goals rows.
Evening close	Close today cleanly ✓ Completed goal ○ Open goal Finish one, or leave an honest note.	The app helps close the loop without shame.	Evening notification screenshot.
Future Goal deadline	“Launch portfolio” reaches its date today Open goal · Adjust date	Specific goal name, not vague reminder.	Deadline notification screenshot.
Habit nudge	Habit notifications use Path reminder context.	Repeated actions become consistency signals.	Optional if visually strong.

Premium notification design language:

- specific
- operational
- calm
- receipt-grounded
- one next move
- no shame
- not generic

11. Free vs Pro, pricing, and North Star Credits

The website must match the app’s monetization truth. Free is useful. Pro deepens the intelligence layer.

Layer	Free	Pro
Daily foundation	Mountain, Path, Elephant, Mahout basics stay useful.	Same foundation, deeper North Star guidance.
Live North Star	Starter North Star Credits.	More monthly North Star Credits.
Brain memory	Basic/core continuity and readable saved context.	Deeper Brain continuity and intelligence surfaces.

Trends & patterns	Preview / focused access.	Full trends and patterns.
Habits & behaviors	Focused preview set.	Fuller habits and behaviors command center.
Letters & reviews	Limited where product allows.	Morning/evening letters and weekly reviews.
Guidance	Foundation and starter guidance.	Richer, more contextual guidance.

Pricing copy:

- Pro Monthly — \$7.99 / month — Flexible
- Pro Yearly Founder — \$54.99 / year — Only \$4.58 / month — Best value — Save 43% vs monthly

North Star Credits trust block:

North Star Credits are used for live North Star replies and deeper on-demand intelligence. They are not used for Path actions, Mountain goals, Elephant mood logs, Mahout journaling, reading saved memories, or existing letters. Pro refills monthly. Free starter credits are one-time.

Forbidden monetization claims:

- tokens
- unlimited
- top-up
- Plus
- weekly plan
- family plan
- lifetime
- remove limits
- unlock premium features
- limited time discount unless true and legally supported

12. Website information architecture and section-by-section content

Order	Section	Headline	Content	Visual
1	Hero	Five elements. One North Star.	Hero copy + CTA + phone mockup/North Star element orbit.	Phone screenshot: North Star main.
2	Human problem	Life scatters.	Emotional story about goals, tasks, moods, reminders, unfinished plans.	Subtle scattered cards becoming one system.
3	North Star origin	Start with the life you are building.	Explain future vision → ideal future self → guide.	Onboarding/future-vision screenshot + North Star visual.
4	Five elements overview	Mountain, Path, North Star, Mahout, Elephant.	Five premium cards with concise copy.	Transparent element icons.
5	Connected loop	From future vision to today's next action.	Loop diagram and system explanation.	Loop diagram.
6	Element deep dives	Aim, act, feel, reflect, be guided.	One rich section per element.	Screenshots per element.

7	North Star Brain	The Brain behind your North Star.	Brain sections and daily evolution.	Brain screenshot + constellation visual.
8	Habits & behaviors	21 days. 66 days.	Path-backed reps become habits and behaviors.	21/66 visuals + app screenshots.
9	Trends & patterns	Movement and repetition.	Show trends vs patterns separately.	Trend/pattern screenshot.
10	Letters/reviews	Letters from your receipts.	Morning, Evening, Weekly.	Letter/review screenshots.
11	Modes	Talk to North Star in the mode your moment needs.	Auto + mode cards.	Mode selector screenshot.
12	Notifications	Reminders that know what your day is holding.	Lanes and deadline notifications.	Notification screenshots.
13	Free vs Pro	Free foundation. Pro depth.	Clear comparison without making Free useless.	Membership screenshot.
14	Pricing	One Pro membership, two cadences.	Monthly and Yearly Founder.	Pro card screenshot.
15	Trust/FAQ	Personal clarity, user control.	Privacy, cancellation, credits, Android launch.	Simple trust icons.
16	Final CTA	Build a life with a North Star.	Play Store/waitlist CTA.	Logo + phone mockup.

13. Visual system and billion-dollar design direction

Mahout should feel premium spiritual-operational: calm, intelligent, emotionally grounded, and deeply usable. It should not look like a generic SaaS page or a therapy/AI gimmick.

Design area	Use	Avoid
Palette	Ivory/warm white, soft lavender, royal purple, midnight violet, muted gold, soft sage, blue-gray.	Neon, crypto gold, harsh red/orange, dark aggressive marketplace style.
Shapes	Rounded cards, soft rings, constellation lines, glass surfaces, subtle shadows.	Sharp corporate icons, noisy dashboards, childish cartoons.
Typography	Large calm hero headlines, compact explanatory body, section badges, generous but not empty spacing.	Tiny feature text, overlong paragraphs, all-caps shouting.
Illustrations	Transparent 3D/glass symbolic assets with consistent lighting.	Random stock photos or inconsistent AI art styles.
Screenshots	Clean phone mockups with carefully staged demo data.	Raw screenshots with debug labels, clipped text, personal data, old UI.
Motion	Slow glow, orbit, soft fade, gentle loop diagrams.	Bouncy gamified animation, flashy AI effects.
Interaction	Anchor links, “Explore the five elements,” section cards that expand/scroll smoothly.	Overcomplicated scroll hijacking or animations that hide content.

Premium layout rhythm:

- Hero must be memorable, not crowded.
- Every major section needs one sentence, one visual, and one proof point.
- Alternate emotional story sections with product proof screenshots.
- Use white/lavender space intentionally; avoid huge empty cards.
- Do not overuse tables. Use card groups and diagrams for value; keep detailed comparison lower.

14. Complete asset and screenshot checklist

Capture screenshots that prove the story. Use consistent demo data and avoid private details.

Screenshot	Website use	Capture requirements
North Star main	Hero / guidance layer	Mode selector or Brain/letters entry visible; meaningful guidance message.
North Star formation / onboarding	Future vision story	Screen asking future self/life vision/chief aim.
Mountain Future Goals	Direction	Goal names, due dates/progress if clean.
Mountain Today Goals	Daily lanes	Mixed open/completed state; strikethrough if available.
Path actions	Action right now	Linked action list, checkoffs, reminders.
Path timer	Execution	Active focus timer/action title.
Habits	21-day habit story	Habit progress, 21 days if visible.
Behaviors	66-day behavior story	Behavior progress / best window / consistency style.
Trends/Patterns	Movement and repetition	Trend cards, pattern library, evidence if visible.
Brain overview	North Star Brain	Core/Voice/Mentors/Memories/Learned/Patterns/Signals/Trends.
Brain memory/learned detail	Continuity	Demo memory/insight/pattern; no personal data.
Morning Letter	Start day with direction	Premium, personal, Future Self letter.
Evening Letter	Close loop	Day receipts and reflection.
Weekly Review	Week receipts	Goals/actions/moods/patterns connected.
Modes selector	Conversation modes	Auto/Analytic/Reflective/Motivator/Mentor visible if possible.
Mentor mode	Premium guidance lens	Mentor mode selected with safe non-impersonation copy.
Mahout reflection	Journal/meaning	Reflection prompt or saved journal.
Elephant mood	Emotional weather	Mood check-in or mood history.
Notifications — lanes	Operating surface	2 lanes still open with ✓/○ rows.
Notifications — deadline	Future goal deadline	Specific goal title and actions.
Membership Pro Yearly	Pricing	Premium Pro card, yearly selected, benefit rows.
Membership Pro Monthly	Pricing	Monthly selected, benefit rows.
North Star Credits explanation	Trust	Credits explanation visible.

Demo data to use across screenshots:

- Future vision: Build a calm, focused, financially stable life with meaningful work, strong health, and presence at home.
- Future goals: Build a steady deep work rhythm; Launch renovation portfolio; Read 20 books this year; Walk 4 mornings each week; Save for family trip.
- Today goals: Write daily goals; Complete one deep work block; Send project estimate; Read 10 pages; Evening walk.
- Path actions: 25-minute focus block; Draft estimate email; Read 10 pages; Set tomorrow's first lane.
- Mood: Calm but stretched; Focused; Tired but steady.
- Reflection: I kept returning to the work when I made the next step small enough.
- Brain insight: You follow through better when the day starts with one clear lane instead of a full list.

15. Image-generation briefs for every element/sub-element

Create transparent PNG/SVG assets and larger hero composites. Keep the style consistent across all assets.

Asset	Detailed brief
Hero five-element orbit	A premium hero composition: phone mockup showing North Star, surrounded by Mountain, Path, North Star, Mahout, Elephant symbols connected by soft glowing lines; Brain constellation behind phone; white/lavender cosmic calm.
System loop diagram	North Star at top, Brain in center, Mountain/Path/Elephant/Mahout around it, arrows for vision → goals → actions → emotions/reflection → memory → guidance.
North Star	Luminous star/compass above a calm life-map; faint future-self outline; thin elegant lines to goals/actions/mood/reflection/memory.
Mountain	Serene abstract mountain with glowing path up slope, goal flags/lane markers, soft North Star above peak.
Path	Glowing path of stepping stones/checkmarks/timer rings leading from mountain toward viewer.
Elephant	Elegant elephant silhouette with moon/cloud/rain/sun symbols and rhythm waves; mature not cartoonish.
Mahout reflection	Open journal with glowing handwritten lines, inner compass, memory fragments.
Brain	Luminous abstract brain constellation with cards/nodes for Voice, Core, Memories, Patterns, Trends, Mentors, Today's Evolution.
Future Self Core	Glowing identity seed/core crystal with rings; values, pillars, life vision.
Voice	Soft sound waves from star/journal page; boundaries and tone.
Mentors	Abstract council of guiding lights orbiting a star; no recognizable real people.
Memories	Floating memory cards connected by thin glowing lines.
Learned	Small growing light/tree inside brain constellation.
Patterns	Connected dots and repeating loops forming rhythm.
Trends	Soft line charts over days/weeks for mood/effort/follow-through.
Today's Evolution	Morning/afternoon/evening checkpoint lights along day arc.
Habits 21	21-day ring of glowing checkmarks; path line becoming sprout.
Behaviors 66	66-day arc; action marks transforming into smooth rhythm.
Letters	Morning sunrise page and Evening moonlight page; North Star seal.
Weekly Review	Seven day cards connected into one arc with North Star insight.
Modes	Central star with orbit chips/icons for Auto, Work Focus, Analytic, Reflective, Motivator, Mentor.
Notifications	Android notification card with actual goals rows and check/open markers.
North Star Credits	Small soft star-shaped credits orbiting North Star; not crypto, not tokens.
Pro card	Premium Mahout Pro card with pricing, Best value badge, benefit rows; calm and trustworthy.

Asset formats:

- Transparent PNG 2000×2000 for elements.
- SVG where possible for icons.
- Section illustration 2400×1600.
- Hero composite 3000×1800.
- Social preview 1200×630.

- Play Store feature image 1024×500.
- Light and dark/purple-background variants.

16. Copy bank: hero, sections, cards, FAQ, SEO, CTAs

Use these blocks as copy source. Edit lightly to fit the current site structure; do not repeat all of them.

Hero A

Five elements. One North Star.

Mahout is an AI life operating system that connects your future vision, goals, actions, emotions, reflections, and guidance into one calm system.

Hero B

Build a life with a North Star.

Mahout turns your future vision into daily direction — so your present self can stay close to the life you are building.

Human problem

Most people are not lost because they do not care. They are carrying too much at once: goals, tasks, emotions, unfinished plans, reminders, and the quiet feeling that life is moving without enough direction. Mahout brings those pieces into one calm system.

Different from apps

A task app tracks actions. A habit app tracks streaks. A journal stores reflections. A mood app tracks emotions. A chatbot answers questions. Mahout connects them.

North Star

Your North Star is the ideal future version of you — formed from the life you are trying to build, then used to guide the choices you make today.

Brain

North Star has a Brain. It remembers your future vision, goals, actions, moods, reflections, mentors, habits, behaviors, trends, patterns, and receipts — then uses that context to guide you with more continuity over time.

Path/Mountain

Mountain decides the direction. Path carries the next step.

Habits

After 21 consistent successes, repeated action can begin to look like a Habit. After 66 consistent successes, deeper Behavior patterns can start to emerge.

Letters

Your North Star does not write from a blank page. It writes from your receipts: what you chose, what you did, what you avoided, what you felt, and what kept repeating.

Pro

Free keeps the foundation open. Pro deepens the intelligence: fuller North Star guidance, more monthly credits, letters, reviews, deeper Brain continuity, and richer pattern guidance.

Credits

North Star Credits are used for live North Star replies and deeper on-demand intelligence. They do not meter basic goals, actions, journaling, mood logs, or reading saved content.

FAQ copy

Question	Answer
What is Mahout?	Mahout is an Android life operating system that connects goals, actions, mood, reflection, memory, and North Star guidance.
Is Mahout just a chatbot?	No. North Star is one part of Mahout. The app also includes goals, actions, timers, journaling, mood check-ins, letters, reviews, habits, behaviors, trends, and memory.
What is North Star?	North Star is your ideal future self, formed from the life you are trying to build, then used as guidance for present-day decisions.
What is the Brain?	Brain is the memory and intelligence layer behind North Star: voice, core, mentors, memories, learned patterns, signals, trends, and daily evolution.
What stays free?	The daily foundation: goals, actions, journaling, mood logs, saved context, and starter North Star Credits.
What does Pro add?	Pro deepens North Star guidance, monthly credits, letters, reviews, Brain continuity, trends, patterns, habits, behaviors, and richer memory-backed guidance.
What are North Star Credits?	Credits are used for live North Star replies and deeper on-demand intelligence. They are not used for goals, actions, journaling, mood logs, or reading saved content.
Is Mahout available on iOS?	Mahout is launching on Android first.
Can I cancel Pro?	Yes. Subscriptions are managed through Google Play.

Is Mahout therapy?	No. Mahout is a personal clarity and life operating system. It is not medical care, therapy, or crisis support.

Primary keywords	AI life operating system, personal North Star, goal tracking app, daily goals app, reflection app, AI journaling app, habit and goal app, mood and reflection app

17. Surgical website build rules for Codex/developer handoff

The website is already built to some extent. The next build phase should be a surgical enhancement, not a rebuild.

- **Inspect first.** Codex should read the current website files, route structure, components, styling system, and asset pipeline before editing.
- **Patch smallest missing sections.** If hero exists, improve copy/layout. If five elements exist, enrich them. Do not duplicate sections.
- **Keep a component map.** Hero, Story, FiveElements, ConnectedLoop, Brain, HabitsBehaviors, LettersReviews, Modes, Pricing, FAQ.
- **No broad redesign.** Do not change global routing, package structure, build tooling, or styling framework unless user explicitly asks.
- **No fake claims.** No unsupported privacy/security, medical, AI, or subscription claims.
- **Assets separate from content.** Use placeholders only where assets are missing; document exact asset slot and filename.
- **Responsive first.** Mobile hero and section stacking must be polished before desktop gimmicks.
- **Performance.** Use optimized images, lazy loading, and lightweight animations.

Build phase	Goal	Allowed changes	Verification
Web W0 Audit	Map existing site	Read-only	Report components/pages/assets/current gaps.
Web W1 Story hero	Add five-elements/North Star story	Hero copy/layout only	Hero not repetitive, CTA visible.
Web W2 Five elements	Explain Mountain/Path/North Star/Mahout/Elephant	Section/card content + assets	Each element has purpose, connection, screenshot slot.
Web W3 Connected loop	Show system loop	One diagram section	Loop explains goals→actions→habits→Brain→guidance.
Web W4 Brain	Separate Brain section	Content cards + screenshot slots	Brain includes core/voice/mentors/memories/learned/patterns/signals/trends/evolution.

Web W5 Habits/behaviors	21/66 story	Feature section	Does not overclaim; tied to Path actions.
Web W6 Letters/reviews/modes	Rituals and conversation modes	Feature sections	Mentor mode uses lens/standards language, not impersonation.
Web W7 Pricing/trust	Free vs Pro and credits	Pricing/FAQ	No tokens/unlimited/fake tiers.
Web W8 Assets/screenshots	Drop final visuals	Image replacement only	No broken ratios, alt text present.
Web W9 QA	Responsive polish	Small CSS fixes	Mobile, desktop, accessibility, SEO.

18. QA checklist and launch readiness

Use this checklist before publishing the website or handing it off.

- Hero explains Mahout in under 10 seconds.
- Five elements appear early and are explained as a connected system.
- North Star origin story is clear: future vision → ideal future self → guidance.
- Mountain is goals/direction; Path is actions right now; Path links back to goals.
- Brain is a separate section and includes the important app-backed sections.
- Habits 21 days and behaviors 66 days are explained without overclaiming science.
- Trends and Patterns are separate and clear.
- Morning Letter, Evening Letter, and Weekly Review are explained.
- Auto, Work Focus, Analytic, Reflective, Motivator, and Mentor modes are explained if visible/real.
- Mentor mode does not claim impersonation of real people.
- Notifications show actual lanes/deadlines and not generic pings.
- Free vs Pro is honest and consistent with app.
- North Star Credits are explained; no “tokens.”
- Pricing matches app: \$7.99/month and \$54.99/year Founder only if still true.
- No unsupported claims: unlimited, clinical, therapy, guaranteed success, encryption unless verified.
- Privacy Policy, Terms, support email, Play Store link/waitlist state are present.
- All screenshots use clean demo data, no private info, no debug labels.
- All images have alt text.
- Mobile layout is polished first.
- Performance: optimized images, no giant uncompressed assets.
- SEO metadata and Open Graph images are present.
- CTA matches launch state: Get Mahout on Android / Join waitlist / Request early access.

Final no-guess summary

What the website must make people remember

Mountain shows where you are going.

Path shows what you are doing now.

Elephant shows how you are carrying it.

Mahout helps you understand it.

Brain remembers and learns.

North Star helps you become it.

What makes Mahout different

Most apps split the person into separate tools. Mahout connects goals, actions, moods, reflection, habits, behaviors, trends, patterns, memory, letters, reviews, and guidance into one living system.

The final brand line

Five elements. One North Star. A living system for becoming who you said you wanted to be.
